

# Matthew Yanzer

(843)-696-9639

1305 Francis Marion Circle, Moncks Corner, South Carolina 29461

## Professional Summary:

Multi-talented computer science student able to take on any required task and adapt to changing conditions with resourcefulness. Dedicated to business success, eager to develop additional skills and advance professionally.

## Education:

Bachelor of Science in Computer Science:

Charleston Southern University, Charleston, SC

Graduation Anticipated 2021

GPA: 3.7473

### Relevant Coursework:

- CSCI 301: Survey of Scripting Languages
- CSCI 315: Data Structure Analysis
- CSCI 325: Object-Oriented Programming
- CSCI 330: Computer Architecture
- CSCI 332: Applied Networking
- CSCI 415: Algorithms (in progress)
- CSCI 431: Operating Systems (in progress)
- CSCI 495: Systems Analysis & Software Design
- MATH 222: Calculus II
- MATH 330: Discrete Mathematics

## Skills:

- Experience in computer languages
  - C++
  - Java
  - HTML
  - Perl
  - Python
- Technical Knowledge
- Troubleshooting
- Goal-oriented
- Active listener

## Work History:

Team Member

Chick-fil-A in Goose Creek, SC

August 2017 to current

- Keep work areas clean, organized and safe to promote efficiency and team safety.
- Operate all frying machinery safely to reduce workplace accidents.
- Continuously check food products for quality assurance according to strict guidelines.
- Work as chef in the kitchen with minimal customer interaction; however, offer excellent customer service when applicable.

## Accomplishments:

Palmetto Fellows scholarship

Jairy C. Hunter, Jr. scholarship

## Example of experience:

The courses that I have taken in pursuit of a Computer Science degree have been some of the biggest challenges that I have worked through. One challenge that I will always remember was taking Data Structures. Halfway through taking the class my grades were subpar because I was having trouble learning some of the concepts. In response, I spent the entirety of my spring break working on the second project, perfecting its code and ensuring everything ran optimally. However, I ultimately received a grade of 60 for missing one line of code that would make the program work slightly better. Initially, I was very discouraged; but after thinking it through, I decided to persevere and take some extra time that semester to rework a lot of the assignments I did poorly on and resubmit them for a possibly better grade. By the end of that semester, I had reworked and improved my previous grades and passed the class with a B. I will always remember this experience as it taught me to persevere through difficult tasks and helped me recognize the value of staying committed to my work.
